LABORATORY TECHNICAL REPORT

Item Description: One oval cabochon of Agate polished on the dome.
Dimensions: 55.00 x 33.00 x 12.35 mm
Weight: 38.40 grammes.

Agate is part of the quartz group of minerals. It is cryptocrystalline in composition. This piece is brown and beige fortification Agate. It is not dyed.

This piece is unique. It has white Agate marking which may be read as "ALLAH" and "MOHAMMAD" (see photographs).

The marks and the whole piece are entirely of natural origin and are in no way modified by man except to polish the dome of the cabochon to reveal the marks.

Signed.....
